

# Saran Jayakumar

Java Full-Stack Developer

## Professional Summary

Motivated **Java Full-Stack Developer** with a Bachelor's degree in **Electronics and Communication Engineering** (2024). Proficient in **Java, Spring Boot, React, HTML, CSS, JavaScript, SQL, and MySQL**, with hands-on experience in developing responsive web applications and **RESTful APIs**. Strong foundation in **Object-Oriented Programming (OOP)**, **database design**, **frontend-backend integration**, and software development best practices. Experienced with **Git, GitHub, Maven**, and version control through academic and personal projects. Passionate about building scalable, maintainable applications and eager to contribute strong technical, analytical, and problem-solving skills while continuously learning and growing in a collaborative software development environment.

## Certifications

### Claude 101

Anthropic

### Claude Code in Action

Anthropic

### Model Context Protocol

Anthropic

### Agent Skills

Anthropic

### OOPS in Java

SimpliLearn

## Technical Skills

### Languages

- Java
- JavaScript (ES6+)
- SQL
- HTML5 & CSS3

### AI-Augmented Dev

- Claude Code
- GitHub Copilot
- MCP
- Ollama & OpenWebUI

### Tools & Practices

- Git
- GitHub
- Postman

### CS Fundamentals

- OOPs
- DBMS
- REST API design

### Databases

- SQL ( MySQL )
- MongoDB

### Frameworks & Libs.

- Spring Boot
- Node.js
- React.js

## Technical Experience

### ONE SCOOP (AI - Agumented Development) WebsiteLink

Java | Spring Boot | React | MySQL | JWT

- Developed a multi-role full-stack management system with Spring Boot and React to streamline order workflows, staff management, and sales tracking.
- Implemented Role-Based Access Control (RBAC) using Spring Security and JWT, protecting API endpoints and dynamically routing 4 distinct user roles.
- Built a tableside order-taking flow for servers that automatically dispatches real-time bills and invoices to the cashier dashboard.
- Designed a normalized MySQL database schema with 7+ tables to manage transactions, inventory, and daily/monthly/yearly profit statistics.

### News App WebsiteLink

HTML | CSS | JavaScript

- Developed a fully responsive news web application using HTML, CSS, and modern JavaScript.
- Built a Node.js/Express backend proxy to securely handle third-party API keys and manage CORS requests.
- Implemented backend in-memory caching to improve page load speed and minimize API requests.

### MeteoBridge MCP Server

Java | SpringBoot | SpringBoot AI

- Developed a dynamic **MCP** backend in Java, enabling **Large Language Models** to overcome static training data limitations
- Enabled **AI agents** to autonomously fetch and analyze current temperatures, weather alerts, and forecasting data in real-time

## Academic Project

### 2023 - 2024 Dynamic Wireless E-Vehicle Charging

Arduino Nano | Embedded Coil | Prototype Testing

- Designed and implemented an inductive power transfer system for EVs using a ground-embedded charging pad and onboard receiver
- Achieved up to **95% charging efficiency** in prototype tests

## Education

### 2021 - 2024 Bachelor of Engineering | K.Ramakrishnan College of Engineering | Trichy

CGPA - 7.1

Specialization in Electronics and Communication

### 2019 - 2021 Diploma Certification | Sri Vignesh Polytechnic College | Trichy

Percentage - 80%

Specialization in Electronics and Communication
